SUMMARY

I am a Cybersecurity student at Bina Nusantara University. I have a strong interest in technology and I always try to follow the latest industry trends. I have a great willingness to learn new things and improve my skills every day. I am ready for new challenges and dedicated to working hard to achieve goals in the digital security field.

EXPERIENCE

PT Aplikanusa Lintasarta | Jakarta, Indonesia | Internship

Feb 2025 - Feb 2026

- Cyber Security Intern – Cybersecurity Delivery | Feb 2025 – Feb 2026
 - Designed and managed a private lab using Active Directory Services to safely test security risks and simulate cyber attacks.
 - Integrated an XDR (Extended Detection and Response) solution within a private lab environment to enhance threat visibility and response.
 - Developed a custom Bash-based automation tool to streamline security testing and exploitation within an Active Directory (AD) environment.
 - Checked and distributed security software to Indosat Ooredoo customers.
 - Set up Cowrie honeypots and used the ELK Stack to track and analyze illegal access attempts on a real-time dashboard.
 - Tested security systems by simulating hacking techniques.
 - Evaluated different security tools (like AI and Endpoint Protection) and wrote research reports and "how-to" guides.
-

INDEPENDENT PROJECT

- **Deployed an open-source SIEM (Wazuh) using Docker on a Windows environment via WSL2**
 - Set up a centralized security monitoring server using Docker containers to manage log indexing and data visualization
-

EDUCATION

S1 Teknik Informatika, Bina Nusantara University

Sep 2022 - Present

- Utilized Hack The Box to gain hands-on experience in penetration testing and system exploitation.
 - Leveraged CTF platforms to sharpen analytical and problem-solving skills in cybersecurity.
-

ADDITIONAL INFORMATION

- **Technical Skills:** Basic Python Scripting, Penetration Testing,
- **Languages:** Bahasa, English
